Assignment 2: Concept

Submission deadline: **Friday, 29. November 2013, 23:59**
Submission details: Only one group member submits the solution incl. a group.txt file with the member names.
The other members **must** submit the group.txt.
All submissions must be in english.

Task 1: Elaborate a Concept and Prepare a Presentation

In the practicals of this course, you are going to design, develop and evaluate either...

- a potentially new text input technique for a mobile phone (or tablet, remote control, etc.)

- a potentially new crossing technique

- a potentially new technique for selection of small targets

  or

- a potentially new touch input technique (like MircroRolls, zooming, etc.)

...in a group of maximal 4 students. In this first assignment you are going to define your idea.

a) Write the first page of a paper of your idea using the ACM Template (Word, Latex). Examples for "1st pages"
were provided in the lecture. The page should include a good title, your names, a short abstract, an introduction
and some sketches. It should address the benefits of your idea compared to "state of the art" solutions.

b) Prepare and submit exactly 15 powerpoint slides for a PechaKucha presentation of your idea. During your
presentation, you should be able to explain the benefits of your concept within 5 minutes (20 seconds per slide).

The presentations will be held on the 3rd and 4th of December. A slideshow of your submissions will run automatically
with exactly 20 seconds per slide. You won't have to bring your own presentation gear. The sequence of the presentations
and further information will be provided on the 1st of December.

Group Finding If you have problems finding a group or group members, use the ILIAS system or write a e-mail to
jens.nickels@uni-ulm.de until Sunday, 17 November.
